**Re: Section 272 Sunset of the BOC Separate Affiliate and Related Requirements (272 Sunset Performance Measurements), WC Docket No. 02-177- REDACTED**

Dear Ms. Dortch:

Pursuant to the staff's request, attached are data showing the number of interstate special access circuits and Feature Group D ("FGD") orders submitted by Verizon's affiliate and non-affiliate carrier customers and Verizon's retail customers using the industry-standard Ordering and Billing Forum Access Service Request ("ASR").

Verizon has provided data for January through March 2004 for each state where Verizon is subject to Section 272(e)'s requirements. The data show for each service category the number of circuits Verizon's 272 and non-272 affiliates ordered; the number of circuits Verizon's non-affiliate wholesale carrier customers ordered; and the number of circuits Verizon's retail customers ordered out of Verizon's interstate access tariff(s) during this period. The Feature Group D data reflect orders, not circuits, submitted by Verizon's carrier customers for Verizon's Feature Group D service. Verizon's retail customers do not purchase Feature Group D service.

As the attached reports show, Verizon's affiliate and non-affiliate carrier customers submit orders for Verizon's special access and Feature Group D services using the industry-standard ASR. Verizon's retail customers do not submit orders for special access services using the ASR. Verizon personnel use the ASR in its retail operations in the seven original Bell Atlantic states (New Jersey, Pennsylvania, Delaware, Maryland, Virginia, DC, and West Virginia), and in the New York-New Jersey Corridor, but do not use the ASR, in the manner that it is used by Verizon's carrier customers, to initiate retail service requests in those states or in the former NYNEX states where Verizon is subject to Section 272(e)'s requirements.
